

 THE ART OF DETAILING AND REFINISHING

About Us

Based in Yorkshire, we are a specialist paint spraying and detailing company. Our team has years of experience, including time served at McLaren, Mercedes and Porsche specialists amongst others. We provide a unique service with guaranteed workmanship.

With accreditations from leading manufacturers and using the latest technology combined with state-of-the-art equipment we have the perfect setup to achieve next level results for your vehicle.

Operating from our facilities in Doncaster, our goal is to provide the pinnacle of vehicle refinishing, detailing and protection, delivering breathtaking results every time. Founded on a passion for excellence and customer service, we provide a comprehensive range of solutions offering outstanding quality of finish, whilst continuously striving to exceed industry standards.

We welcome you to share our experience for yourself. For further information or to arrange your visit please contact us.

The Automotive Paint Team

Our certified automotive paint team are highly trained and experienced to return your car to its original condition. We offer top quality painting services including repairs, customisations and car paint restoration services. No job is too small or too big. We only use quality materials from some of the world's leading paint and refinishing manufacturers. We also use an advanced computerised paint matching system to find the exact match for your vehicle's paint finish.

Smart Repairs & End Of Lease Repairs

Small Medium Area Repair Technology

SMART repair is a collective name for repair technologies focussed on fast and efficient repair of small damages and provides a fast and cheaper repair to an area of cosmetic damage. This specialized process of repairing a vehicle eliminates the need to re-paint an entire panel. It is generally less expensive and quicker as the repair is confined to a smaller space. We specialise in **SMART** repairs and **end of lease** repair work which means we know how to keep costs down.

All our repairs are done in a controlled environment in our state of the art facility, for optimum results.

Bespoke Paint Jobs

We offer fully bespoke paint jobs ranging from a complete re-paint of the car to adding small personalised touches and ideas. We also have access to classic car and specialist paints.

New Panel Replacement

If your vehicle needs a new panel, rather than just a repair and re-paint, we can facilitate that too. We offer a comprehensive service of supplying the panel, painting the panel to ensure that it precisely matches the rest of the car, and then fitting the panel. Alternatively we can supply and paint the panel and deliver the panel to be fitted elsewhere.

Vehicle Detailing & Paint Correction

These services restore a vehicle to a show condition. We are devoted to the perfection of vehicles paintwork. A lot of time is spent fully correcting the vehicles paintwork to create an immaculate mirror perfect reflection in any light.

As Professionally Accredited detailers we only use high quality products, some of which are only available to us by the manufacturer as one of their accredited and approved detailing centers.

We offer a comprehensive range of detailing and paint correction packages, as well as cater for bespoke requirements subject to the condition of the vehicle. We also offer a comprehensive Interior Deep Clean package and for the pure enthusiast and perfectionist an Engine and Bay Detailing package.

New Car Detail

With a new car, you would expect the car to be presented with the utmost care boasting flawless paintwork with no marks, scratches or swirls. However, this generally isn't the case. Storage conditions, transportation and poor PDI preparation at the dealership can cause an array of paint defects, marks and scratches before you even receive the vehicle. Some dealers are likely to offer their in-house 'protection packages'. In reality, these packages are poor value for money. These products are generally applied incorrectly and over poorly prepped paint from the in-house valet department with minimal training on how to properly prepare and protect your new vehicle.

The New Car Detail package removes any light swirl marks, scratches and paintwork defects as well as significantly boosting clarity to give the car the best start in life.

Ceramic Coating

We are manufacturer certified and approved to provide high-quality Ceramic Coatings and with that, we also provide high-quality Paint Correction as standard. This ensures your vehicle will look its best. We recommend paint correction before coating any vehicle new or old. Even new can have swirl marks.

Our Ceramic Coatings protect against many different elements that are a constant threat to your vehicle's exterior such as:

Weather induced fading, loss of gloss, acid rain, bird waste, tree sap, insect damage, sun UV rays, hard water spots, brake dust, paint overspray, fuel stains and de-icing agents/road salt.

Once your vehicle has been coated, it will have a deep high gloss finish, feel smoother and look better than new for

years to come and eliminates the need for any polishing or waxing. Coated surfaces are further protected by having oleophobic, stain-water repellence, and hydrophobic features, their main benefits are water repellence, stain repellence, scratch resistance, and waterproofing.

We offer a comprehensive range of the best professional ceramic coatings on the market, including coatings for alloy wheels, interiors and glass.

We offer a free, no obligation, vehicle inspection.

Paint Protection Film - PPF

Paint Protection Film (PPF) was originally developed by the military in the 1960s to protect helicopters from flying debris in combat. It has since been developed into a high-quality invisible film that can be applied to any new or used car.

It's becoming increasingly popular amongst luxury car owners to wrap their vehicles in protective film as to preserve the car's original paintwork.

This offers added protection against small nicks and chips to the paintwork as well as offering some UV protection from sunlight.

We only use quality brands and these our cut to your specific vehicle and professionally applied by skilled, trained technicians. We can offer both clear film and satin finish film.

Partial Front

Full Front

Full Body

Alloy Wheels

We offer full Alloy Wheel Refurbishment and Repair. We believe your vehicle wheels are a key feature and contributes to the overall appearance of the car.

- Standard Alloy Wheel
- Diamond Cut and Polished
- Split Rims
- Classic Car Wheels

Luxury & Classic Cars

As well as maintaining the prestige looks of super and luxury cars, we provide a paint and restoration service for your classic and luxury car bringing it back to its former glory!

We cater to meet the unique and quality expectations of our customer giving the pristine finish as if it had just come out of the factory.

We only use original parts (if available) and materials where possible for a true authentic look and if you are feeling a bit different you could ask our team about our bespoke services making your car a little more personal to you.
